Professional Summary

Full Stack Developer with experience delivering production multi-tenant SaaS applications using React.js, TypeScript, Node.js, and Firebase. Built configurable ERP workflows, granular role-based access control, AI-assisted form generation, and HRMS attendance solutions. Strong focus on reusable React interfaces, API integration, tenant-aware data design, and maintainable full-stack systems.

Technical Skills

Frontend: React.js, TypeScript, JavaScript (ES6+), Next.js, React Native, Tailwind CSS, Material UI, shadcn/ui
Backend: Node.js, Express.js, REST APIs, Firebase Cloud Functions, JWT Authentication, RBAC, Scheduled Jobs
Data & Tools: Firebase/Firestore, MongoDB, PostgreSQL, Supabase, Prisma ORM, Git, Docker, Figma
AI Integration: OpenRouter APIs, LLM Integration, Prompt Engineering, Structured JSON Generation

Professional Experience

Full Stack Developer Mar 2025 – Present
Innover Labs *Pune, Maharashtra*

- Developed React and TypeScript features for multi-tenant business applications, including configurable forms, tenant-specific workflows, and reusable user interfaces.
- Implemented granular role-based access control for users and groups, enforcing permissions across forms, form groups, and organizational boundaries.
- Integrated backend services and Firestore data operations with React applications, supporting tenant-aware access and dynamic configuration.
- Built AI-assisted form generation using Firebase Cloud Functions and OpenRouter LLM APIs, transforming natural-language requirements into structured form configurations.
- Contributed to an HRMS attendance platform featuring Bluetooth beacon-based kiosk attendance, automated facial verification flows, and shift-based employee notifications.

Frontend Development Intern Mar 2024 – Apr 2024
InternPixel *Remote*

- Built responsive React components for client-facing applications and translated Figma designs into production-ready interfaces.

Selected Projects

ClockInHR | *Multi-Tenant Attendance & HRMS Platform* Innover Labs

- Contributed to a multi-tenant HRMS platform supporting employee attendance, organization/site management, shift workflows, and HR operations.
- Worked on Bluetooth beacon attendance: a login-free kiosk mobile flow detects a nearby beacon, resolves the organization and site through backend data, and triggers employee face scanning for automatic attendance marking.
- Supported shift-aware automation with scheduled jobs that send employee messages based on assigned shifts, reducing dependence on manual reminders.

DexERP | *React.js, TypeScript, Node.js, Firebase, OpenRouter* Innover Labs

- Developed a configurable multi-tenant ERP form builder that enables organizations to define custom forms, data structures, and workflows without application code changes.
- Implemented tenant-scoped Firestore access patterns, granular RBAC, and AI-generated form configurations using server-side LLM integrations.

Natours | *Node.js, Express.js, MongoDB, REST APIs* GitHub

- Built a tour-booking REST API using MVC architecture, JWT authentication, role-based authorization, filtering, sorting, pagination, rate limiting, and input sanitization.

Education

Ness Wadia College of Commerce Pune, Maharashtra
Bachelor of Computer Applications (BCA) *CGPA: 8.5 | 2021 – 2024*
